Keeping the 'All' in Burstall...

October 2026

Greetings,

I hope this message finds you well. Many residents are completing fall yard clean up. Thank you for keeping the town looking tidy.

Reminder that curbside yard debris bag pick up is complete for the season, therefore, residents can now haul bags to landfill during landfill hours. Council would like to sincerely thank our Town Foreman for hauling over 1000 yard debris bags from May until October! Thank you to those residents that were mindful of the weight of the bags, adhering to the five-bag limit and having bags curbside by 9am. Good work everyone!

The secondary containment sea can for waste oil and antifreeze is now ready for service. It is located alongside the electronics sea can at the landfill.
Accepted items: Waste oil and antifreeze, clean 5 gallon pails (no lids), 1 litre and 4 litre empty jugs and used filters. Residents must now use this service during landfill hours starting on Saturday November 7. As of that date, there will no longer be waste oil and antifreeze dumping at the town shop.

Crack sealing has now been completed for 2026 with sealing on Railway, Jubilee, Martin and part of Maharg. This will continue to be an ongoing budget item in order to keep our streets in good shape.

Good revenue news! Based on averages from previous years, the Town trailer park was estimated to bring $20,000 in revenue, however it brought in a whopping $38,000! As well, the lagoon dump was estimated to bring $2,400 revenue, and to date has generated $12,930. All very positive!

Last, and by no means least, thank you to Canadian Natural Resources Limited (CNRL) for their recent donation of $1000 to the local Emergency Services. This donation will be used toward purchasing gas monitors and a docking station.

Sincerely,

Mayor Bodnarchuk
